**WORDFIND COMPETITION** WIN

Win one of two Shimano fishing rod packages supplied by Klingspor worth \$215 RRP

Find 10 letters scattered throughout the magazine which spell a common tool. All correct entries will go in the draw. Entries close 1/11/24. See page 2 for more.

## From the Desk of the Marketing Manager

Congratulations to all our lucky winners from the last edition! As the days get warmer, why not heat up your chances with our thrilling Wordfind competition? You could be one of the two lucky winners to reel in a Shimano Fishing Rod Package, generously sponsored by Klingspor.

But that's not all! Our stunning cover competition, sponsored by Loctite, offers you the chance to win big. Simply purchase any product featured on page 3, and you'll be entered into the draw to win a fabulous mini fridge and merch pack worth \$300!

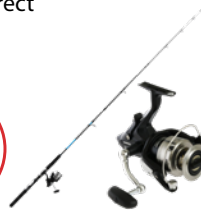

Plus, we're adding an extra bonus: buy any ARCOPRO® machine from page 6, and you'll receive a FREE helmet. Don't miss out on our fantastic deals on welding consumables on pages 7 and 8.

Dive into this edition for loads of bonus items and surprises throughout. Happy reading and good luck! ✨

### WORDFIND COMPETITION

Find hidden in this issue 10 letters which make up the name of a common tool. Find all the letters (*like this W*) to spell the tool. Email your answer, name, company, address and phone by **1 November 2024**. Two correct entries will be randomly drawn and the winner will be notified.

# TIMKEN

# Quick-Flex Couplings

## Durability for the Long Haul

When your equipment operates in harsh environments, you need coupling products you can count on. Quick-Flex elastomeric couplings are designed to withstand those harsh conditions, yet require minimal maintenance. They're easy to install and require no lubrication. With a lifespan that can match that of your equipment, Quick-Flex couplings can keep your overall cost of ownership competitively low.

### Efficiency

Quick-Flex couplings, with their versatile design, provide a solution to a wide variety of coupling applications. Plus, you won't need large inventories of spare parts – the only replacement part needed is the insert itself and it can be replaced in a matter of minutes without removing the hubs.

### Durability

There's no metal-to-metal contact with Quick-Flex couplings, so you'll save money by avoiding damage to hubs or other metal components. For harsh environments, including wash-downs for food processing, we offer a stainless-steel version of each coupling.

### More Uptime

Your hubs and metal components can remain intact when you use Quick-Flex couplings. Our design helps eliminate interference between coupling hubs that can damage your equipment. As needed, you can replace the urethane insert quickly and easily.

### Innovative Design

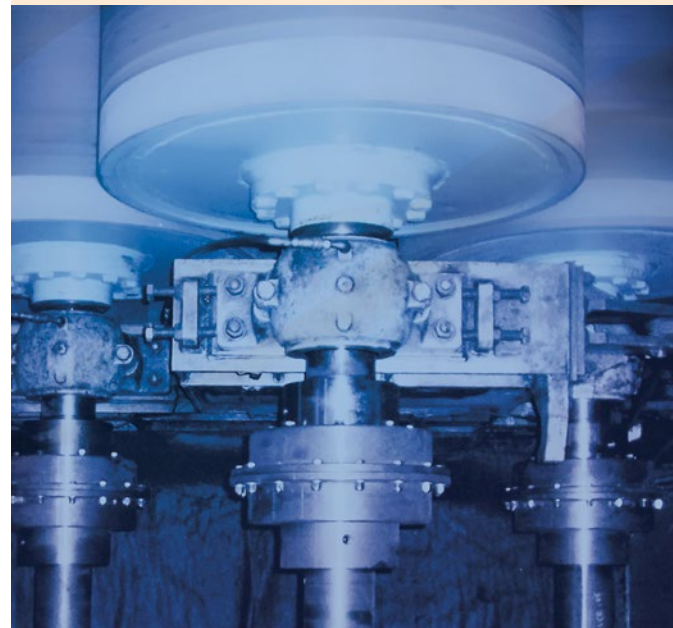

Our couplings withstand up to 2° of misalignment, as well as dampening vibration and shock loads in your equipment.

### Reduced Inventory

The versatility of the Quick-Flex design promotes standardisation across your plant, reducing the need to stock multiple coupling styles and configurations.

## APPLICATIONS

- ▶ **Motor to gearbox** (low torque/high speed)
- ▶ **Gearbox to driven equipment** (high torque/low speed)
- ▶ **Motors to pumps**
- ▶ **Any drive shaft to a driven shaft**

Standard coupling with red insert and high-speed cover.

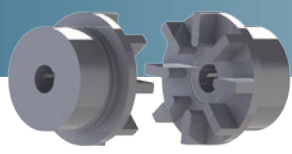

Standard coupling with blue insert and high-speed split cover.

Standard coupling with high-performance aluminium cover.

### Hubs

Jaw-in-shear design.  
Fully machined and balanced.  
Material: C1020.  
Stainless hubs (S303) available for QF5 and QF15 couplings.

### Red Insert (Standard)

Relatively soft urethane compound, 48D durometer.  
Temperature range of -50°C to 100°C.  
Suited for a wide range of applications.

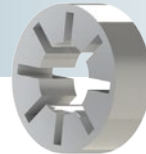

### Blue Insert (High Torque)

Relatively stiff urethane compound, 60D durometer.  
Temperature range of -50°C to 100°C.  
Good option when replacing grid, gear and chain couplings.

### Black Insert (Highest Torque)

Suited for very high torque applications, 68D durometer.  
Temperature range of -50°C to 100°C.  
Used with split covers in heavy duty applications.

### White Insert (High Temp)

Heat-resistant urethane with a 60D durometer.  
Temperature range of -50°C to 177°C.

### Standard Cover

High-speed cover, suitable for a wide range of applications.  
Used with red, blue and white inserts.

### High-Speed Split Cover

High-speed vertically split cover.  
Used for high speed and torque applications.

#### \*\*Alternative Covers

- ▶ High-performance aluminium cover
- ▶ Low-speed split cover

## KEY FEATURES

- ▶ Solid and split covers are designed to accommodate higher speeds and increased torque
- ▶ Inherently balanced with precision machining for high-speed applications
- ▶ Design dampens torsional vibration and shock to help extend life of the coupling and surrounding components
- ▶ Quick-Flex inserts help reduce downtime and replacement costs because inserts can be replaced without moving or disassembling the driving or driven equipment

## SOLUTIONS FOR YOUR NEEDS

**Whatever your application demands, you'll find a wide range of Quick-Flex couplings designed to suit your needs. Choose from multiple insert and cover configurations that withstand some of the most extreme environments.**

- ▶ Twelve sizes with bores ranging from 9.4mm to 285mm
- ▶ Designed for continuous torque levels from 43Nm to 188,800Nm
- ▶ Designed for peak torque levels from 85Nm to 377,500Nm
- ▶ Couplings accept shaft misalignment, up to 2°
- ▶ Split cover options help resist axial separating force under high torque
- ▶ Standard and double-ended spacer couplings available for shaft separations of 25.4mm to 3,048mm, for increased application acceptance
- ▶ Four bore options available to meet customers' needs:
  - 1) Bored, keyed and set screws style – clearance and interference fit
  - 2) Bushing style
  - 3) Splined style
  - 4) Mill motor style
- ▶ Four insert choices for varying torque needs and temperature ranges up to 177°C

## TIMKEN® Spherical Roller Bearing Solid-Block Housed Units

When the going gets tough the **TOUGH get going** and they don't come any tougher than the Timken® BLUE BRUTE Solid Block Housed Units. The first choice for agriculture, timber, mining, construction and other demanding applications. Cast steel housings with high-performance Timken spherical roller bearings deliver outstanding durability in extreme conditions, withstanding severe shock loads and vibration.

- ▶ **Solid One Piece Cast Steel Housing**  
Maximum strength. Takes the knocks and protects the bearing
- ▶ **Double Row Spherical Roller Bearing**  
High load, self-aligning with choice of shaft mounting options
- ▶ **Interchangeable With Split SN Series Housings**  
New and retrofit applications
- ▶ **Fast, Easy and Safe Installation Ensuring Successful Operation**  
Unit remains sealed during installation – no contamination
- ▶ **Best Sealing Systems Ensure Maximum Bearing Protection**  
Triple seals on bearing plus closed and sealed open cover options
- ▶ **Wide Range Now In Stock**

# TIMKEN® SNT PLUMMER BLOCK HOUSING KITS

**One part number for a complete metric shaft kit.**

Making selection, ordering, stocking and fitting so easy.

Standard kit comes with SNT housing, 222 series spherical roller bearing, metric shaft adapter sleeve, TSNG double lip shaft seals and two spacer rings.

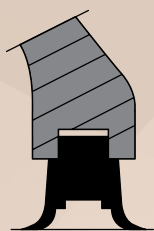

## ONE KIT - ONE BRAND - GUARANTEED PERFORMANCE & RELIABILITY

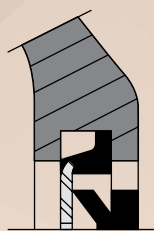

### SUPERIOR TIMKEN® SNT PACKAGE

- ▶ Split cast housing. High strength and precision providing maximum support to the bearing
- ▶ Centre markings on housing base for easy setup and alignment
- ▶ Multiple locations for grease entry, grease draining, temperature and vibration sensor attachment
- ▶ Highest quality and performance spherical roller bearings
- ▶ Multiple sealing options to meet the demands of all applications. TSNG type included in kit
- ▶ Interchangeable with SNA/SNG/SNH/SNL/SNN/SNU/SNV

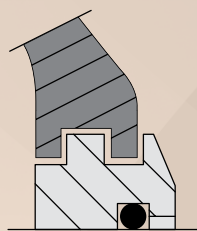

### SEALING OPTIONS

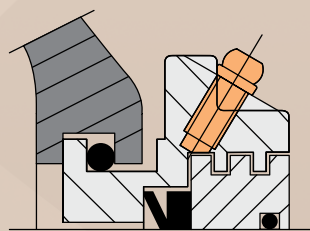

DOUBLE-LIP (TSNG)

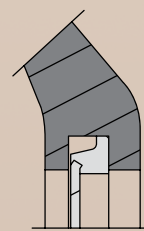

V-RING (VR)

LABYRINTH (LO)

TACONITE (TA)

END COVERS (EC)

- TSNG** General purpose double lip seal included in kit. Other options shown can be purchased separately.
- VR** V-ring performs similar to TSNG but ideal when shaft surface condition is not good enough for TSNG.
- LO** Labyrinth non-contacting seal for higher speed applications such as fans.
- TA** Taconite seal system for max protection in harsh environments. Contact seal and labyrinth with grease purge.

**SmartWasher®**  
BIOREMEDIATING Parts Washing System

The CRC SmartWasher® Bioremediating Parts Washing System is both self-cleaning and environmentally friendly.

The pH neutral cleaner called OzyJuice is used to effectively clean parts, removing grease and grime while the naturally occurring process of bioremediation is used to turn those potentially hazardous contaminants into a harmless by-product of carbon dioxide and water.
